

I am writing today in opposition to a bad piece of legislation. 2025 is just plain bad and out of touch with reality. 2025 is written for some make believe state residences, I guess. Oregon is overtaxed as it is, which is evident by businesses and people abandoning the state. Our tax rate and fees are already too high in Oregon. I simply cannot understand how a group of people in our legislature actually believe 2025 is a good thing, I have not read one part of 2025 that is reasonable.

Thank you,

Arnold Wardwell
