Measure, Appointment or Topic: HB2025

I would beg you to vote this down. Oregon already has some of the highest transportation taxes. If this increase goes through it will make trucking transportation in Oregon too expensive and will cause small businesses who are already struggling to be forced out of business. In turn that is people losing their jobs. We don't need a bill that will allow to divert the funds to other non-transportation related areas. Please look at the economic impact this will have on rural areas. As a small business owner, we cannot afford more taxes.
