Measure, Appointment or Topic: HB2025

When are we going to see improvement on the last time you did increased taxes and fees on gas for roads and bridges improvements. We still have weather checked and pot hole main roads and bridges in the metro area. It was promised that they would be handled the last time (5 or 6 yrs ago). Poor legislative oversight of appropriated taxes and fees are to blame for most of the budgetary problem. Instead of doing the work . you're lazy and just Willy nilly keep going to the public to increase taxes and fees ( 35-350%). I wish I could tell the govt do the same with my "fixed" income.
