

Submitter: Leon Muller

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

This proposed taxation boondoggle is another example or reason why companies and individuals are leaving this state to escape rampant out of control taxation. In addition, there is little or no accountability established to provide safeguards on the use of the tax funds; either existing or proposed. It appears the democratic majority of Oregon's legislature has no concept of reality and care little as to the impact these senseless tax increases have on small businesses and your average citizen....How about you take a serious look at where existing funds go and how they are spent before you saddle the population with outrageous tax increases.
