On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Please just STOP!!! Stop with increasing the taxes! Do you not realize the impact on the lay person with this bill? People are struggling as it is to keep food on the table, to clothe their families, to maintain a somewhat better quality of life than their parents/ancestors? I challenge you to cut your salaries, to provide your own transportation & fuel & to do your jobs as you were elected to do. If you keep raising taxes no one will be able to provide for their families which means more assistance paid out which means more taxation. Vicious cycle. Look at the big picture. Is your legacy going to be the people who kept raising taxes?
