Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Dear lawmakers, I'm writing this in strong opposition of hb2025. This will negatively impact my family as the cost of living in Oregon is already really high. My husband drives semi truck and we are barely scraping by as it is with the cost of fuel in Oregon being one of the highest in the nation already let alone if you pass this law and make it higher. There are plenty of other ways that you as lawmakers can come up with these funds other than to take more money out of low income and hard working families pockets. If you keep raising taxes my family like many others will have no choice but to move out of Oregon as we just cannot afford more taxes.
