On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I oppose HB 2025. This proposed 11 billion plus tax bill is not good for Oregonians. The added gas tax in the proposal will hurt lower income families trying to make ends meet like myself. I can't afford an EV or have one make sense for my family and rural driving. The addition of tolling is a bad idea as well. Tolls should not be placed on our main freeway unless there is an option for an expressway to make it worthwhile to be tolled like most other sensible states do with tolling. This bill also threatens our livelihood and small business with the huge added cost. Not a good bill for oregonians! Please vote NO!
