Committee:

Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I am a native Oregonian and the direction this state has gone, overall, is incredibly heartbreaking to see. I never expected my home state to be a place that I no longer could afford to be. The cost of living is insane. Gas prices are ridiculous. And all I'm seeing are ideas to make all of that increase even more. I no longer enjoy living here. I'm afraid to express my opinions because they aren't what people want to hear, the state has gone so far left, it's lost its damn mind in every capacity. And the only solution is to raise the cost to be here more? We are a dual income household raising two kids and are considered lower class. Oregon is out of control. In every capacity.
