

Submitter: Kenny Valdez

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Oregon is already taxed enough. Gas prices are already extremely high. There's no reason to take more money from the working class especially when there is other solutions. They should be working on making everything more affordable. Maybe audit the government and figure out where Oregon is wasting all the money. If they can't do things within budget and without continuously taxing us more every time something comes up they should be replaced. Raising taxes should be an absolute last resort in emergency situations
