Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

We live in Eastern Oregon and absolutely cannot afford any more taxes. It is so sad to see that the Democrats are pushing this bill through without listening to the people of Oregon. Where does this madness stop? When people decide that they can not afford to live in Oregon anymore. Already we are taxed so much more than other states. If the money that is already taxed was transparent where we could actually see where all our dollars go, that would be one thing. We have a business and we have to run it like a business so that we can survive. Why does the Oregon government not have to do the same thing? This bill is so very wrong for all of Oregon. It does not say much for the Democrats that are trying to push this through. They are not looking out for Oregon, unfortunately it looks like they are listening to people that have certain agendas. Definitely not what the citizens of Oregon want.
