Measure, Appointment or Topic: HB2025

I would like to STRONGLY oppose this bill. Oregon already has a super high income to debt ratio, we are a state heavily populated with retirees who have a limited income. We also have an extraordinarily high homeless population which if they keep getting taxed more and more will never be able to pull themselves out of being homeless. There needs to be some cuts on unnecessary programs before raising taxes and the bills asking for tax raises need to be put to the residents of the state to be voted on, not crammed down our throats.
