Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I have been in Portland area since 1989. I love my city and have been a business owner for 28 years. I have serviced this area and speak to new people daily and hear the concern not only for the condition of the city and now heavy concerns of the cost with out any transparency of tax spending. The taxes and cost of living is already too high and as a single mother of 4, I am looking to move to a more affordable state. I do not see any improvement happening and fully concerned and dismayed especially of this passes. I have had to budget my family yet the government co to yea to increase taxes with out concerns of the people paying them. I am very concerned that this only open doors for more excessive spending and constant tax increase. Please do not pass this tax increase.
