Committee:

Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

This is sincerely insane! How does this support working people? We are already one of the most expensive places in the country to live and now you are trying to make it worse! Manage what you have better or find another way. We can't continue to live like this. I have a retired age friend who is looking at being homeless because of lack of affordable housing now you want to raise everything more and make it impossible to get to work. Please vote NO!
