Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I love this beautiful state, but hate what you are allowing it to become. I implore you to say NO on HB 2025. There is a limit to what the citizens can pay in taxes. What you are asking in additional taxes is unsustainable. How many businesses have to leave the state before you wake up? How many small businesses have to close because you put an unsustainable burden on them? You have had to walk back certain bills you passed because you never consider the consequences of your policies. Look at how some of your "dream ideas" have panned out. We don't feel safe in our big cities. You claim compassion for the homeless while providing all the drugs they need to keep them on the streets and without the help they really need. The state is just part of our tax burdens. Our local communities are doing the same. It seems no matter what you claim the additional tax is for we never see the results. My husband and I live on a budget, we live within our means. If taxes go up we have to cut expenses elsewhere. There is no where else to cut. Will you please run our state government within its means. SAY NO Thank you for listening and do what is best for the people of this state so we can continue to live here.
