

Submitter: Lisa Wiggs

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I am blessed to live in this beautiful state! I was raised and raised my children on a working cattle and hay ranch in South Central Oregon, God's country. We were, and are, still quite rural being 11 miles from any services. This transportation bill will have a great impact on gas prices, as I understand. We are already struggling with high fuel prices for travel and ranching, I can't imagine rising prices to the point where families cannot afford to support the very things that we depend on to EARN our living. I am also an owner of a small, hometown Cafe that many depend on everyday. The cost of delivery alone will cause me to increase my menu prices due to higher transportation taxes all around. I sincerely hope our legislatures will keep their constituents in mind and realize just how hard we work and how much harder they are planning on making our lives, once again....NO on HB2025!!
