On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Hello,

My family and I oppose any new taxes, or cost of living is already very tough. 12 cents more on gas that is already one of the nations highest is awful. How do you expect us to live here???

Why don't you get creative using one of our best renewable resources?? Timber. You are literally allowing massive cash pile to be burned up every year. Unleash timber harvesting to generate revenue and prevent annual wildfires with forest management and replanting. I want to see some creativity from Salem, not the typical "just raise taxes". Use your minds!

Sincerely

Damon Rapozo
