

Submitter: Joe Rowe
On Behalf Of: The planet
Committee: House Committee On Rules
Measure, Appointment or Topic: HB3402

Oregon is the shame of the nation in transportation. We fund outdated visions with no accountability. You are proposing a billion dollar law thrown together in hours on the last day of a six month legislative session. You have again abandoned long term community transportation planning in the 28 amendments to HB2025 28. HB2505 is also horrible for our planet but it is not the dumpster fire of HB3402. If you are going to boil us alive, at least go back to the lower heat of House Bill 2025.

House bill 3402 repeats our history as one of the few states with no accountability for our state department of transportation. You have once again failed to act on what the people of Oregon have demanded in Transportation reform. We want sustainable options and putting our children's future before the profit and pollution created by such reckless and destructive transportation lawmaking. Salem is polluted by lawmakers who can not protect our planet and can not follow the transportation leadership of Europe and Asia.
