

I am writing today in opposition to 3402. 3402 itself on speed bumps might be ok, what's not ok is the taxes democrats are sliding in from the failed 2025. The increases in fees and taxes that were in 2025 are just as unreasonable and out of touch with reality in 3402, nothing's changed. It's a particularly cowardly move slipping the increases into 3402.

Thank you,

Arnold
