Committee: House Committee On Behavioral Health and Health
Care
Measure, Appointment or Topic: HB2948

I support this house bill 2948. It is crucial that clinical administrator can make much better and more correctly decisions for school nurses practice than nonclinical administrator who lack of enough knowledge and common sense for policy and procedue making and decision. Medical field is different than educationmal field, it does require special training and practice to build knowledge so decisions, policy can make rationally. In this way, schools will have less lawful problem.
