

Submitter: Brett Naylor

On Behalf Of:

Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure, Appointment or Topic: HB2949

I write to you in strong support of HB 2949, the risk bond study associated with the critical energy infrastructure hub along the banks of the Willamette river. The original choice of this site for fuel storage was no doubt out of convenience decades in the past, but the failure of transparency and planning for dealing with potential disasters due to the sighting and lack of maintenance of these structures needs to be dealt with as quickly as possible. This has been put off for many years by the owner operators of these sites. It's common sense to look into a way of spreading the risks and costs involved, especially among those most responsible for these risks. Please pass this bill.
