

SEE Committee Members-

During the public hearing yesterday on HB 4102 there was a question about the existing requirements related to conflicts of interest and the procurement process. Specifically, if there is something already in state statute or rules that would have the same effect as the language in section (9) on page 4-5 of the [-1 amendment](#). Attached are two documents provided by DAS. The first document is the general ORS and OAR citations applicable to procurements throughout the executive branch, including DEQ. The second is the standard statewide template for personal services contracts for procurements like those contemplated in HB 4102. In that template, especially in sections 6 and 8, you'll see references to qualifications and conflicts.

Please let me know if you have any additional questions.

Thank you,

Beth
