

Submitter: Nathaniel Parker-Jones  
On Behalf Of: Oo-nee Sea Ranch and Oregon Seaweed  
Committee: Senate Committee On Energy and Environment  
Measure, Appointment or Topic: SB1525

Our coast is some of the least developed in the nation and this bill would provide a more stable foundation for coastal communities to grow as well as supporting more sustainable fishing practices. While I'd like to have seen more sustainable energy included, this bill holds much needed momentum.

I urge all our senators to vote yes.
