House Committee On Judiciary

Measure, Appointment or Topic:

HB4138

I am strongly in support of federal officers not concealing their identities as they are public servants and are not allowed anonymity. Many people are using their tactics to impersonate ICE agents and this leads to extremely dangerous situations where people can be kidnapped by non government entities and trafficked to similar conditions of inhumane centers and potential death. ICE isn't allowed anonymity while attacking people who are complying and mistreating human beings. If the rule of law still exists, prove it, hold these terrorists accountable or we will see complete anarchy continue to unfold in our streets.
