Measure, Appointment or Topic: HB4123

I fully support tenant privacy. Where it stands right now, if you have a disability and apply for accommodations, landlords are not required to keep your medical information private. This puts residents in a place where they have to either publicly disclose their personal health information to receive accommodations or not receive the accommodations. It should have already been required that medical information needs to remain private. HIPPA laws were created for a reason. This is an extension of that and the ADA privacy laws.
