

Submitter:

Lise Brown

On Behalf Of:

Committee:

Senate Committee On Early Childhood and  
Behavioral Health

Measure, Appointment or  
Topic:

SB1546

I support this bill because no child or teen should have access to artificial intelligence without parental or teacher supervision because their brains cannot discern truth from fiction using this technology and AI often provides adult content that's inappropriate for children. Teachers and parents should always know whether information is AI.
