House Committee On Agriculture, Land Use, Natural Resources, and Water

Measure, Appointment or
Topic: HB4105

I have lived in Oregon my whole life. I love that I have lived in a natural rain forest and welcome rain. With the environment going to the dump. It's my belief we need to protect our Trees to help global warming fish and wildlife. Our oceans are over fished globally. I would like to see Oregon stay green. We need to protect our trees for the future ,especially old growth.when we cut them the roots die too. This causes alot of the landslides that are caused from trees being over forested. Please replanting needs to be done on lands that are harvested. But leave our old growth alone.

Thank you for hearing my comments.
