

Submitter: Sharon Hawks

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1582

Honorable Chair and Memebbers of the Committee,

Thank you for this opportunity to write you in support of SB 1582. My concern is that in the future we create an energy system that is stable and efficient. This bill is a start on creating such a system where community members create their own energy reservoirs from which an electrical company can draw during g peak energy times. This allows all of us to save money and keeping our environment clean by not having to build out new plants or buy energy from other systems that may use fossil fuels. This is a smart approach to energy needs that will just keep expanding. Please vote to support this innovative approach to keeping our systems working smartly and efficiently into the future. Thank you!
