

Submitter: Rachael Drake
On Behalf Of:
Committee: Senate Committee On Early Childhood and Behavioral Health
Measure, Appointment or SB1548
Topic:

I absolutely support this bill, it gives reasonable access still while providing some potential safety measures to protect those (specifically children) from unintentional use or poorly calculated consumption. As a mom of an adult son with substance use disorder, I can testify that the packaging of many of these legal substances feels targeted towards young people, even children. The marketing claims on these over the counter uncontrolled drugs are absurdly misleading, and if we are going to continue to allow legal access to these harmful substances, the least we could do is more safely and responsibly packaged them!
