

Submitter:

Tara Johnson

On Behalf Of:

Committee:

House Committee On Transportation

Measure, Appointment or Topic:

HB4008

I live in an area that will never provide public transportation, yet I gladly pay the .1% payroll tax because I know that value of public transportation for my friends and family who live where public transportation is available. For some, it means the difference between groceries and no groceries, medical appointments and no appointments, and other vital services. Not everyone has a vehicle or even the ability to drive, after a medical procedure for example. Please consider establishing this task force as a vital part of a functioning and healthy community.

Thank you,
