

Submitter: Dorothy Dougher

On Behalf Of:

Committee: House Committee On Agriculture, Land Use, Natural  
Resources, and Water

Measure, Appointment or Topic: HB4006

We believe it is wrong to set precedent proposed in HB4006. It is of value to a few that impacts, especially in light of future rainfall pattern resources, the wellbeing of the river and all dependent life.

The present work to control nitrate emissions would surely be negatively impacted and with it the health of all.

Who would gain if you pass this bill?
