

Submitter: Jayne Pitchford  
On Behalf Of:  
Committee: House Committee On Agriculture, Land Use, Natural Resources, and Water  
Measure, Appointment or HB4105  
Topic:

Over half a million people, never mind wild life and a healthy salmon population, which is a lifesaver to many families for its health benefits as well as a significant contribution to our local economies.... So why would a state legislation do anything to interfere with this golden situation? Our fresh water will be more restrictive as global warming continues at a galloping pace. We need to continue to protect our water sheds as if our lives depend on it because they surely do! Protect our resources. Do your job. Thank you.
