On behalf of today's youth and future generations, I urge you to oppose this bill. We need to prioritize habitat for wildlife and recreation, as well as valuable carbon storage. Yes we need timber but not reckless logging that disregards the other valuable resources our forests hold. We already have policies in place to make sure enough timber is supplied.

This particular law would be extremely expensive and encourage more lawsuits and drive up costs for the taxpayers. I urge you to not move it forward.  
Thank you!
