

Submitter: Gary Clarida

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1582

Committee Members

Energy demand in Oregon is high and will only increase. Our electrical system needs serious upgrades to develop the resilience to meet the expected demand. The transmission system needs to change in order to meet the demand. Resilience can be improved by strengthening the transmission system and by diversifying the source of the power. SB1582 is a good start on improving the later. I strongly urge you to support its passage.

Gary Clarida
