

Submitter: Bob Marquis

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1582

Thank you for the opportunity to testify in favor of SB 1582. Because our electrical power grid experiences peak demand in different seasons and at different times of the day, grid stability requires the capacity to expand and contract based on customer demand. However, building and maintaining large power plants to fill occasional demand is expensive. SB 1582 proposes a less expensive solution by linking the grid to energy production distributed across existing customer-owned homes and businesses. This bill will allow the utilities to access homeowner and business generated energy to supplement the grid at times of peak demand. And the customers get paid for it.

I urge you vote in favor of SB 1582.

Sincerely,
Marjorie DeBuse
