

Submitter: Tyler Gilmore
On Behalf Of:
Committee: House Committee On Agriculture, Land Use, Natural Resources, and Water
Measure, Appointment or HB4105
Topic:

Dear Co-Chairs Helm and Owens, Vice Chair McDonald and Members of the Committee,

The climate crisis is not something happening "out there" that we will not be affected by. It is impacting human health on deep levels and worsening our forest protections would only increase those harms. House Bill 4105 would lead to extensive future monetary costs to repair the damage done by the reduced carbon sequestration, poorer water quality, poorer air quality, reduced ecosystem resilience, etc. It is at least a bad financial decision, if not a bad moral one.

Therefore, I oppose House Bill 4105. This timber industry bill prioritizes timber production over other forest values on state forests. It undermines the state forest habitat conservation plan and would result in more clearcuts, more lawsuits, less habitat for salmon and wildlife, and less carbon storage.

The bill is unnecessary. The Department of Forestry regularly meets or exceeds its timber harvest goals, often at the expense of clean water, habitat for fish and wildlife and carbon storage goals.

It's expensive. The state can't afford unneeded legislation with a large fiscal impact, especially with the current fiscal crisis. It would lead to more costly litigation. The bill creates a new right to sue the Department of Forestry. It would only allow recipients of timber revenue access to the courts to challenge implementation of the timber harvest rule.

I urge you to oppose this bill. Instead, I encourage this committee to focus on measures that would increase carbon storage in our state forests and safeguard our public resources for our children and future generations.

Please don't let this bill pass out of committee.

Sincerely,
Tyler Gilmore
