Committee:

House Committee On Revenue

Measure, Appointment or Topic:

HB4148

I live in a coastal community that struggles to pay for essential services due to large increase in population associated with tourism. The citizens of tour communities should not have to cover increased costs associated with visitors. We need to be able to use a larger portion of transient lodging taxes to support infrastructure, emergency services, and to protect our natural resources, not just to use the funds on advertisements to increase tourism.
