Laura Bird

On Behalf Of:

Committee:

Senate Committee On Health Care

Measure, Appointment or Topic:

SB1528

I oppose SB1598 because I believe that medical care is between the doctor and patient. This opens the door to dangerous possibilities such as the state , DEA stepping in with chronic pain patients. This state could turn into Tylenol only hospitals. Taking pain relief from hospice patients. It's a reality other states have done this.

Opens the door to vacine passports which is also dangerous for chronic pain patients. I have IC and covid cystitis happens with interstitial cystitis patients. Just look up on the IC network website. I wouldn't doubt it causes this with a number of chronic illnesses that have bladder pain as a symptom. Some people are allergic to vaccinations. Keep the state out of health care only the doctor and the patient can make these decisions.
