

Submitter: David Wall
On Behalf Of: Mr Oregon OPPOSES SB 1585
Committee: Senate Committee On Commerce and General Government
Measure, Appointment or SB1585
Topic:

I OPPOSE [SB 1585].

In Yamhill County, there are seven(7) cities with populations less than five thousand [5,000] residents.

Several cities are in dire need of sewage treatment plant and corresponding infrastructure (pipes, valves, excavations, et cetera) upgrades or complete sewage treatment plant rebuilds to address required capacities and advanced treatment protocols.

Due to their incredibly stupid City Council's decisions, permitting residential development projects, without addressing required infrastructure to support sewage treatment requirements associated with development (almost entirely residential housing developments), serious State and Federal discharge violations into the receiving waters is all but assured.

[SB 1585] does not address unincorporated areas (Service Districts).

You mean well, but the authors of [SB 1585] appear to have made an incomplete decision.

David S. Wall

Mr. Oregon Concurs and says, "The salmonid fishes are rejecting the Temperature of Final Effluent's effects cumulatively discharged in the Yamhill River by many Municipality's POTWs. (Nutrient concentrations and Biological Oxygen Demand (BOD) should be routinely monitored at multiple sampling points along the Yamhill River.)"
