Measure, Appointment or Topic:

SB1530

Dear Oregon Legislature

As a mental health therapist working in an emergency room, I'm asking that you include healthcare workers in this bill. It is well known that healthcare workers are exposed to more workplace violence than any other professions and yet legislature have opposed making it a felony to threaten or assault healthcare workers. It must be nice to have the power to prioritize your safety above others and to consider exposure to violence part of our job but not yours.

Please add healthcare workers to this bill.

Thank you.
