Measure, Appointment or

HB4105

Topic:

I oppose this measure. While logging has been an integral part of our state's economy we must now realize that the native creatures who are killed or displaced are critical to both our region, local and overall world survival as a functioning environment.

Perhaps the real goal of the legislature shouldn't be perpetuating our destructive path but instead developing how those parts of the state that have relied on logging can move into other industries that are beneficial to our fragile environment

Thank you
