

Chair Prozanski, Vice-chair Thacher, and members of the committee,

I'm writing in support of SB 1587.

We cannot give ICE more tools to target our communities. We are seeing parents, kids, and pretty much any community member being kidnapped from our streets in Oregon. Citizens are being harassed and targeted as well. We know that the private data sold is going to target immigrants, separate families, and hurt our neighbors. I worry about my neighbors every day.

I have various community members offering to pick up groceries, to go to Home Depot for others, and overall take it into their own hands to prevent their neighbors from being taken. I also heard a woman in Washington County is receiving calls from people in her community asking her to please care for their children incase ICE takes them. That's how desperate the community is... they are asking kind neighbors to show up and care for their kids. **Will you?**

It's clear that as Oregonians - WE DO NOT SUPPORT THIS. I urge you to fight for our right as a state to protect the privacy of privacy of Oregonians. We must hold Data Brokers accountable and defend our families.

Thank you for your time,

Paola
