Committee: House Committee On Transportation  
Measure, Appointment or Topic: HB4085

Please do NOT allow automated cars driving in Oregon. This is so ridiculous of a proposal.

My main objection is SAFETY. I was in software for 20 years so I know a computer is only as good as its programming. You can't program for every human scenario on the road; for drivers, pedestrians, bicycles, children and animals that might come into its path. THE BACKUP HUMAN in SOME OTHER COUNTRY TO PICK UP IF THE COMPUTER GOES WRONG IS A RIDICULOUS SET UP

The other reason is JOBS. Why would you want to GIVE TO ROBOTS? What's next, house cleaners? Restaurant servers? Teachers?

Because the logic applied to Why let a robot drive a taxi, would be the same logic as to why not let it teach our children.

But again, it's mostly about safety. If you do pass this, EVERY CRASH WILL BE BLOOD ON YOUR PERSONAL HANDS.

LET HUMANS DRIVE THE CARS, IN PERSON!
