

Submitter:	David Wall
On Behalf Of:	Mr Oregon OPPOSES SB 1545
Committee:	Senate Committee On Judiciary
Measure, Appointment or Topic:	SB1545

I OPPOSE [SB 1545].

From the Text of [HB 1545], "... (a) "Corner cross" means to cross on foot from one parcel of public land to another parcel of public land by stepping across the corner where two parcels of public land and one or more parcels of privately owned land meet..."

So, you want to legalize 'Trespass' on private land by way of [HB 1545] do you now.

I have a solution for private property owners, line your corner area(s) with 'thorny plants.' Well coiffed and dense plantings of Blackberry, Rose and or Pyracantha bushes are good choices.

There are other combinations and techniques on 'U-TUBE.'

David S. Wall

Mr. Oregon Concurr, "Use a double construction of welded wire fence. Plant and weave Climbing Roses, Black berry or Pyracantha affixed to the fence via loose zip-ties. The inward (house facing) are over lapping single sections of welded wire fence raised off the ground [10 inches]. I use the distance between the two fences as a place to put compost materials. The rotting compost provides the plants with nutrients, drains well and remains moist. The segments are easily removed to facilitate aeration and harvesting compost for other uses."
