Measure, Appointment or
Topic:

HB4105

I oppose the current proposed bill to change management directions and priorities of Oregon forest lands.

There is no founded sound land management reasoning for changing current management decisions and direction for my State's forest lands. Management of such precious NATURAL resources and their values must provide for protection and conservation for ALL PUBLICS AT LARGE and for the health of those ecosystems -- not for an ill argued monetary economic gain of few of the populace at the expense of those resources and values.

What is in place is a result of extensive research and associated majority public input and support for having the present balanced approach of the forests' management. Leave as is what is very good management policy and resource decisions on those lands.
