

Submitter:	Mary Greathouse
On Behalf Of:	People of Portland
Committee:	Senate Committee On Judiciary
Measure, Appointment or Topic:	SJR203

I was horrified when ICE invaded the streets of Portland. The idea of masked, unidentifiable agents kidnapping people off the streets was unimaginable. The opposition claims unmasking will put their agents at risk. I say their tactics are what's putting these agents at risk. The gestapo in Germany were awful but at least their faces were visible. I was so proud of the dancing frog movement that drew attention peacefully to these agents tactics and resisted this invasion. I believe that unmasking these agents who are terrorizing our streets and making them identifiable will rein in some of the most egregious behavior less likely to happen. We don't want them feeling that it's ok to gun down citizens in cold blood. They are NOT above the law but anonymity has erroneously given them the feeling that they are above the law. I beg of you to pass this amendment so we can vote on it at the next general election.
