

Submitter: David Wall  
On Behalf Of: Mr Oregon OPPOSES SB 1582  
Committee: Senate Committee On Energy and Environment  
Measure, Appointment or Topic: SB1582

I OPPOSE [SB 1582].

The author(s) of [SB 1582] would have all of us believe the utilities, are going to develop and implement "Distributed Power Plant Programs" at 'No cost' out of the goodness of their corporate hearts to the unsuspecting ratepayers.

To prevent power outages and or rolling blackouts Oregon should embrace Natural Gas Cogeneration Energy Plants and small scale Nuclear Energy Plants.

Selling solar and or wind generated electrical power back to the grid to stave off the electrical power sucking sound of data centers is just plain foolhardy saving the planet nonsense.

Oregon is stuck in the quicksand of climate change while embracing the explosion of residential housing developments, which are eating up valuable irreplaceable farmlands in the process. The enticement of more and more businesses, the grumblings of the need for Tariff relief, water shortages due to ground water depletions, higher food costs and trying to protect Illegal Aliens from being rounded-up and booted back to their country of origin.

Who pays the cost for infrastructure to build and maintain individual homes and businesses power storage systems? Who is going to recycle the wastes produced?

David S. Wall  
Mr. Oregon Concurs. and says, "Oregon to save the planet, enact and maintain residential housing development moratoriums."
