Committee:

Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1582

I oppose SB1582. The reliability of our power grid is very important and improving it would be a good idea; however, this bill will be entirely too costly for rate payers.

Requiring all electric companies to create and administer a distributed powerplant program even if there is no demand or grid needs is bad policy. The rate payers will be bear the financial risk, and that is just making things worse. Please vote NO on SB1582.
