

Submitter: c k

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure, Appointment or Topic: SJR203

Our forefathers learned from experience that accountability and transparency are crucial to citizens ability to uphold the laws of our country. All those that work in service to the country must answer to it too. Wherever there are humans running things, there's going to be complications, and sometimes even corruption. ICE has no exception to the law, it simply says it won't comply - and hasn't. In a country where law and order stand paramount, by a leadership supposedly committed to law and order, we expect all federal immigration officers to comply with the law, or for Congress to defund and disband any tax payer funded group that will not comply with the laws of the land. We've watched the Constitution be violated over and over, and every patriot, everyone who swore an oath to their country, every citizen expects mistakes can be made, but that they will also be learned from and corrected. Correct these injustices now.
