Committee: House Committee On Transportation

Measure, Appointment or Topic: HB4085

Portland would be materially, tangibly and demonstrably more dangerous if this passes. There is evidence of this fact in cities around the country that have allowed shoddy services like Wamo to infiltrate their communities. Self propelling vehicles cannot DRIVE. They cannot make the same split second decisions as a human being, regularly cause accidents because of rogue sunbeams, and even on their best days they get stuck in parking lots honking at each other.
