

Submitter: Jane DAmbrosia  
On Behalf Of:  
Committee: House Committee On Transportation  
Measure, Appointment or Topic: HB4085

I oppose the use of autonomous vehicles in our state. They would require more data centers to power the AI used to drive them. I do not believe they are safe, especially in times of power outages or emergencies, causing additional traffic/collisions. Furthermore, Waymo uses real people in the Philippines to assist in driving the cars remotely, which is unethical and concerning. The people of Portland do not want self driving cars on our streets!
